

JFF Gen AI Use Cases In Workforce Development: Tool Bank

This document serves as a comprehensive guide to the various tools utilized in mapping out the framework for the JFF AI research project. It aims to categorize and describe each tool's unique functionalities and their role within the project. Below is a breakdown of the fields included in this sheet:

Company: The name of the company that developed or provides the AI tool.

Stakeholder: The primary audience or users of the tool, such as individuals or organizations.

Description: A brief overview of the tool's functionalities and purpose.

Tool Type: Classification of the tool based on its primary function or application area.

Category: The broader category under which the tool's main purpose falls, such as helping users find a career or gain skills.

Sub-Category: A more specific classification within the main category, detailing the exact function, like self-discovery or career navigation.

Other Specialization (if not on the list): Additional specialized functionalities of the tool that are not covered by the predefined categories or if fitting for more than one category/sub-category

Link: A URL to the tool's website for further exploration.

Company	Stakeholder	Tool Type	Category	Sub-Category	Other Specialization (if not on the list)	Other Specialization (if not on the list)	Other Specialization (if not on the list)	Link
